18cm Metric Johnny Square® Professional Easy-Read™ Aluminum Rafter Square w/out Manual

Model #: 1956-1800
UPC: 049448194619

To develop one of the world's best rafter squares, Johnson first had to engineer the EZ-Read™ finish, its revolutionary anti-glare protective coating that diffracts sunlight rather than reflecting it, so it looks as crisp in full sun as it does in the shade. The EZ-Read™ finish also increases friction to better secure your square against your lumber when using it as a saw guide. The Johnny Square® is highly durable and accurate. Its solid aluminum body construction with CNC machined edges ensure an accurate reading every time. This rafter square also features continuous scribing notches from 2cm to 12cm as well as handy markers that measure 2x4 board dimensions of 1-1/2", 3" and 3-1/2".

PRODUCT DETAILS

Johnson's 18cm Johnny Square® features a solid aluminum body with CNC machined edges for greater accuracy and durability. The EZ Read™ laser etched graduations have numbers that are highly visible and has a thick edge that is useful as a saw guide. Anyone looking to make fast accurate 45° and 90° markings will appreciate this tool. The new Johnny Square® allows fast accurate markings for rip cuts with carpenters and targeted end users.

- Solid aluminum body for assured durability and precision CNC machined edges for guaranteed accuracy
- EZ Read™ laser etched graduations and numbers are highly visible
- Thick edge is useful as a saw guide
- Continuous scribing notches - from 2cm to 12cm
- Low glare, E-Z™ Read protective anodized finish
- cm scale reads from 3cm to 10cm
- 2x4 board dimension markers for measuring 1-1/2", 3" and 3-1/2"

APPLICATION

This 18cm Johnny Square® is a versatile tool for builders and contractors. Its thick edge is useful as a saw guide - it can be used directly with the saw against the square for cross cuts or angled cuts using the etched protractor scale. It can be used indirectly as well, using the scribing notches to create a saw cut line for rip cuts. The Johnny Square® also simplifies stair layout - its integrated distance and angle scales let you quickly and accurately mark your cut lines on your stringers. And, of course, this rafter square has scales for cutting hip, valley and jack rafters.
