

3-Foot Circ. (12.5" Dia.) Structo-Cast® Measuring Wheel

Model #: 1877-0200
UPC: #049448877027

Simplify your next long-range measurement project with Johnson's Structo-Cast® measuring wheel. It features a three-piece telescoping aluminum handle, with an ergonomic non-slip rubber grip handle, that extends from 18" to 42". With a rigid aluminum frame and durable rubber 12.5-inch diameter tire, this measuring wheel was built to last on even the roughest jobsite. It also features a five-digit, easy-read magnified counter that provides accurate measurements in feet and inches. And storing this tool is a snap with the included convenient folding stand.

APPLICATION

Johnson's measuring wheels are useful for surveyors, civil engineers, landscape architects, paving crews, insurance representatives and more whenever long-range measurements are required. The 12.5-inch diameter wheel on this model makes it ideal for rougher, uneven surfaces and makes measuring a snap for road construction, parking lot and driveway installations and resurfacing and concrete pours. Interior applications include measuring gyms, commercial hallways and residential areas. For measuring across smoother surfaces, consider Johnson's model 1877-0100 measuring wheel, which has a 4-inch diameter.
