

1m Circ. (31.75 cm Dia.) Metric Structo-Cast Measuring Wheel

Model #: 1878-0012
UPC: #049448187805

Simplify your next long-range measurement project with Johnson's Structo-Cast® measuring wheel. It features a three-piece telescoping aluminum handle, with an ergonomic non-slip rubber grip handle, that extends from 54cm to 107cm. With a rigid aluminum frame and durable rubber 31.75-cm diameter tire, this measuring wheel was built to last on even the roughest job site. It also features a five-digit, easy-read magnified counter that provides accurate metric measurements. And storing this tool is a snap with the included convenient folding stand.

APPLICATION

Johnson's measuring wheels are useful for surveyors, civil engineers, landscape architects, paving crews, insurance representatives and more whenever long-range measurements are required. The 31.75-cm diameter wheel on this model makes it ideal for rougher, uneven surfaces and makes measuring a snap for road construction, parking lot and driveway installations and resurfacing and concrete pours. Interior applications include measuring gyms, commercial hallways and residential areas. For measuring across smoother surfaces, consider Johnson's model 1826-2004 measuring wheel, which has a 10.6-cm diameter.
