

6" Dial Caliper

Model #: 1882-0600
UPC: 1882-0600

Johnson's traditional dial caliper provides four ways to accurately measure in one versatile tool, including outside, inside, depth and step up to 6". The graduated dial displays precise measurements in both inches and mm while the non-glare bezel provides clear and easy reading. With its durable fiberglass reinforced nylon construction, this tool is built to withstand rough jobsites. Extend the handy depth rod for quick depth and step measurements including differences in surface elevations.

PRODUCT DETAILS

- Accurately measures outside, inside, depth and step from 0-6"
- Easy to read dial measures in .01" and 1/64th of an inch
- Durable fiberglass reinforced nylon construction
