

10" Inch/Metric Structo-Cast® Try & Mitre Square

Model #: 1910-1000
UPC: #049448101009

The essential marking and checking tool for any woodworker, these try and mitre squares make assessing angles and marking straight cuts easy and accurate. The Structo-Cast® handle is both durable and lightweight, while the heavy-duty blade is made of stainless steel so you'll never need to worry about rust or corrosion. These squares feature graduations in 1/8", mm and cm increments that are permanently etched in black for easy visibility and also measure 45° and 90° angles.

APPLICATION

Johnson's try and mitre squares are the ideal tools for any woodworker or finish carpenter. They can check and mark both internal and external right angles and 45° angles, making them handy for framing, stair-making, shed building and many other carpentry tasks. They are also useful for checking the angles on bench saws and other cutting machinery.
