

Digital T-Bevel

Model #: 1920-0800D
UPC: 1920-0800D

Johnson's digital t-bevel takes the guesswork out of angle duplication and eliminates problems with analog readings and manual measurement transfer. Measure, hold and transfer interior and exterior angles quickly and accurately. Its durable stainless steel blade is rust resistant, and the impact resistant ABS handle is built to last. Large easy reading LCD can be inverted 180° at the press of a button for precision measurements from 0 to 360°. Practical function modes make it handy for reverse miter angles and holding current values.

PRODUCT DETAILS

1920-0800D Includes > 1 3V CR2032 lithium battery

- Combines traditional sliding t-bevel and digital protractor into a single tool
- Reads interior and exterior angles with precision
- Large LCD for easy reading
- Measure, hold and transfer angles from 0-360°
- Durable 8" stainless steel rust resistant blade
- Impact resistant ABS handle
- Function modes for reverse miter angles and holding current values
- Display can be flipped 180° for convenient viewing
- Adjustable locking knob secures blade at any angle
- Auto power off function preserves battery life

APPLICATION

Ideal for accurately measuring, storing, and transferring inside and outside angle measurements. Save time and work more efficiently by holding and transferring angles between workpieces. With Johnson's digital t-bevel, the possibilities are endless for carpentry, woodworking, building cabinets and furniture, making miter joints, installing tiling and much more.
