

7" Magnetic Johnny Square® Professional Easy-Read™ Aluminum Rafter Square w/out Manual

Model #: 1959-0700
UPC: 049448195909

To develop one of the world's best rafter squares, Johnson first had to engineer the EZ-Read™ finish, its revolutionary anti-glare protective coating that diffracts sunlight rather than reflecting it, so it looks as crisp in full sun as it does in the shade. The EZ-Read™ finish also increases friction to better secure your square against your lumber when using it as a saw guide. The Johnny Square® is highly durable and accurate. Its solid aluminum body construction with CNC machined edges ensure an accurate reading every time. This rafter square also features strong magnets for hands-free use as well as continuous scribing notches that are ideal for ripping at 3-1/2" and 5-1/2" as well as handy markers that measure 2x4 board dimensions of 1-1/2", 3" and 3-1/2".

PRODUCT DETAILS

- Strong magnets for hands-free use
- Aluminum body with CNC machined edges for greater accuracy and durability
- EZ Read™ laser etching reduces glare outdoors
- Continuous scribing notches for ripping lumber to any width
- Square has 2x4 board dimension markers for measuring 1-1/2", 3" and 3-1/2"

Warranty Limited Lifetime Warranty

APPLICATION

This 7" Johnny Square® is a versatile tool for builders and welders. Its thick edge is useful as a saw guide - it can be used directly with the saw against the square for cross cuts or angled cuts using the etched protractor scale. It's magnetic edge also makes it ideal for welders since it attaches to ferrous metal. It can be used for measuring or marking angles and setting and checking square before or after welds are complete.
