

5" Magnetic Scriber

Model #: 3420-0600
UPC: 3420-0600

Johnson's magnetic scriber is ideal for marking sharp, accurate lines on a variety of materials such as ceramic, glass, steel, stainless steel and concrete. The magnetic tip is useful to retrieve small parts and steel chips from hard-to-reach places. With its durable metal construction, this tool is built to withstand rough jobsites. The scribe tip can be reversed when not in use and can be safely carried in your pocket or stored without leaving unwanted scratches or holes.

PRODUCT DETAILS

- Carbide scribe for marking sharp, accurate lines on hardened materials
- Durable all metal body construction
- Non-slip knurled finger grip for maximum control
- Strong rare earth magnetic pickup tip retrieves small parts from hard-to-reach places
- Reversible scribe tip for safety and long life
- Convenient pocket clip for easy access
- Hardened carbide scribe tip marks on a variety of materials including ceramic, glass, steel, stainless steel and concrete

APPLICATION

Johnson's magnetic scriber is perfect for making precision marks on hard materials including ceramic, glass, steel, stainless steel and concrete prior to cutting or machining. From do-it-yourself to professionals alike, this tool has endless applications including tiling, window installation, custom glass and ceramics. Can be used for carving words, lines or patterns by making steady, clean lines on working materials. This scriber is also an essential layout tool for machinists, toolmakers, welders and mechanics.
