

12" Digital Magnetic Laser Level

Model #: 40-6080
UPC: 049448060801

Johnson's 12" digital magnetic laser level is a must-have at home or on the job. It provides measurements in five units of measure (degrees, percent, mm/m, in/ft - decimal and in/ft - fractional). Reading those measurements is easy under any conditions - the LCD screen rotates for easy top reading while the digital measurement readings automatically invert when you are taking overhead measurements. Even dimly lit areas don't pose a problem thanks to the level's backlight feature. The level has audible level and plumb indicators for ease of use and features a laser beam to easily transfer reference points. Powerful GripTight™ rare earth magnets hold to ferrous metal surfaces, and calibrating the tool is quick and easy at the press of a button. The level comes with a soft-sided pouch to keep your tool clean and safe when not in use.

PRODUCT DETAILS

40-6080 Includes > 12" Magnetic digital laser level with dot laser and rotating display, 3 "AAA" alkaline batteries, and soft-sided pouch

- 5 construction languages - units of measure (degrees, percent, mm/m, in/ft in decimal, in/ft in fractional)
- Working range of angle measurement is 0° to 182.5°
- Automatic digit inversion for overhead measurements
- Backlight for easy-read in dimly lit work environment
- Laser beam for transfer of reference points
- Powerful GripTight™ rare earth magnets hold to ferrous metal surfaces
- Push button calibration
- Audible indicator at 0° and 90°

SPECIFICATIONS

Accuracy	$\pm 0.1^\circ$ for 0° and 90° , and $\pm 0.2^\circ$ for 1° to 89°
Interior Range	Up to 100'
IP Protection Class	IP54
Laser Classification	Class IIIa
Laser Wavelength	650nm \pm 10nm (Red)
Maximum Power Output	≤ 5 mW
Resolution	$\pm 0.1^\circ$ or 0.1%
Tripod Thread	1/4"-20
Warranty	3 Year Warranty
Working Range	0° to 90°
Working Temperature	14°F-113°F

APPLICATION

This level is perfectly suited for any number of jobs, including jobsite prep, grading, piping, window and door installation and more! This level's laser beam is ideal for transferring reference points, and its strong magnets make it the preferred choice when your project involves ferrous metals, such as working with steel studs or steel reinforced concrete.
