

25' Fiberglass Grade Rod

Model #: 40-6325
UPC: #049448063253

This 25-foot fiberglass grade rod is ideal for reading elevation changes on your jobsite. Its fiberglass construction is durable and non-conductive, meaning it will not transmit voltage during incidental contact with overhead lines. It also features a 4-section telescoping construction and included carrying bag for easy storage.

1 Year Warranty

APPLICATION

Johnson's grade rod is the ideal tool for determining differences in elevation on your jobsite, and its heavy duty, non-conductive fiberglass construction makes it better suited for harsh conditions than aluminum grade rods. It is a must-have for building contractors, paving companies, excavation companies, concrete professionals, plumbers, landscapers and more!
