

## Magnetic Floor Target

**Model #:** 40-6370  
**UPC:** 049448273072

Your laser tools are most useful when you can see the laser line or point. Johnson's magnetic floor target with a printed scale in inches and centimeters enhances the sharpness and brightness of that laser line or point so that it is visible even on a brightly lit jobsite. The target can be mounted to the included back stand to keep the target upright on the floor or ground when you need it to be freestanding. It is also magnetic, so it can be easily and quickly attached to metal surfaces for hands-free use.
