

Self-Leveling Cross-Line Laser Kit

Model #: 40-6605

UPC:

Cross-line laser levels offer the highest value of any type of laser: they're extremely versatile, easy to use and inexpensive. Johnson's self-leveling cross-line laser projects two crisp, clean laser lines simultaneously - one vertical and one horizontal. It also features a manual mode for use at any angle for working on stairs or other non-level projects. Thanks to the laser's visual out-of-level indicator, you'll never need to worry about accuracy - if the laser can't self-level, it will alert you by flashing the beam. With a magnetic target, magnetic bracket, and tinted glasses, this kit has all you'll need to get your laser leveling project started.

PRODUCT DETAILS

40-6605 Includes > Red laser, magnetic target, magnetic bracket, glasses, 2 "AA" alkaline batteries, hard-shell carrying case

- Vertical and Horizontal laser lines
- Manual mode for use at any angle
- Pendulum lock protects laser during transport
