

## One-Sided Laser Detector w/Clamp for Line Generated Lasers with Pulse Feature

**Model #:** 40-6780  
**UPC:** 049448067800

This laser detector is ideal for using red line generated pulse laser levels outdoors, in high ambient light conditions or whenever the human eye cannot see the laser beam by quickly and accurately locating the laser signals. Accuracy is never a problem thanks to the audible and visual indicators that allow for precise leveling. And the included clamp easily attaches the laser detector to grade rods for determining differences in elevation.

### PRODUCT DETAILS

40-6780 Includes > Detector, 9V battery, and clamp

- With this laser detector, a line generated pulse laser level can be used both indoors with bright light and/or outdoors in the sunlight where the beams are not visible
- Audible and visual indicators for precise leveling
- Clamp that attaches to grade rods

### SPECIFICATIONS

Warranty

3 Year Warranty

### APPLICATION

This laser detector was designed for use indoors and outdoors and greatly expands the working range of any pulsed red-beam (632/650nm) line laser. It is a must-have for building contractors, paving companies, excavation companies, concrete professionals, plumbers, landscapers and more! It is not compatible with lasers that do not feature a pulsed operating mode.
