

Machine Mountable 360 Degree Detector with Clamp and Magnet

Model #: 40-6791
UPC: #049448406791

Johnson's machine-mountable laser detector is ideal for using red beam rotary lasers outdoors at great distances, when the human eye cannot see the laser beam, by quickly and accurately locating the laser signals. The detector features a large 360° detecting range, and with a bright LED display for easy reading, the detector displays the information you need to get your leveling job done quickly and easily. This detector comes with everything you need to get your jobsite up and running - including clamps and powerful magnets for attaching the detector to machines, an NiMH rechargeable battery pack, cable, charger, and hard-shell carrying case. The detector can also be paired to Johnson's 40-6792 remote display to repeat the detector's display directly into the operator's cab of the equipment, making it ideal for use on skid steers and other equipment with limited visibility.

PRODUCT DETAILS

40-6791 Includes > Detector, clamps and powerful magnets, NiMH rechargeable battery pack, cable, battery charger, and a hard-shell carrying case

- Ideal for bulldozers, front-end loaders and back hoes
- 360 degree receiving window and is ideal for mounting
