

Elevating Tripod 1/4"-20 Thread

Model #: 40-6796
UPC: 049448067691

Johnson's 40-6796 is a versatile tripod for small lasers, this tripod features a tilting head - when used with a laser with manual or angle mode, any angle from 0 to 90 can be achieved.

PRODUCT DETAILS

- Aluminum construction
- Pan and tilt head for use at any angle
- Ideal for mounting cross-lines and 360° lasers
- Extendable center column
- Working height from 16" to 51"

APPLICATION

Tripods are great for adjusting the height of your laser to set your reference points. In manual mode, the tripod is the simplest way to align your laser to any desired angle.
