

Red Laser Enhancement Glasses

Model #: 40-6842
UPC: #049448068425

Anyone who has used a laser in bright conditions knows how difficult it can be to see the laser beam. Johnson's red laser enhancement glasses filter out ambient light to improve the visibility of any red laser beam. You may also want to consider Johnson's red beam universal detector kit (Model 40-6720) for our full lineup of red beam detection tools.
