

## Dual Purpose Aluminum Tripod with 1/4"-20 Adapter

**Model #:** 40-6861  
**UPC:** 049448068616

Johnson's dual-purpose aluminum tripod, with an adapter that reduces threads from 5/8" - 11 to 1/4" - 20, attaches quickly and easily to laser or optical levels and extends to a maximum height of 65". It also includes an elevating column with fine adjustment knobs for maximum accuracy, while the adjustable tripod feet make this an ideal choice for outdoor or indoor jobsites. With the included nylon carrying bag with a shoulder strap, this tripod has everything you'll need to get up and running!

### PRODUCT DETAILS

### APPLICATION

Tripods are essential tools for the construction and surveying industries - they provide a stable place to mount laser levels for better reading and guiding on the jobsite. This tripod was designed for outdoor uses such as surveying, grading and site excavation as well as indoor uses such as installing cabinets, drywalling and framing.
