

22X Builder's Transit Level

Model #: 40-6910
UPC: #049448069101

Easy to assemble, easy to use and lightweight - this builder's transit level, which consists of a leveling vial attached to a telescope, is a must-have for your next outdoor jobsite. The leveling vial is accessible to $\pm 45^\circ$ on a vertical arc, with graduations to single degrees and reads by a Vernier scale to 15 arc minutes for maximum precision. Its horizontal tangent screw and vertical lock with tangent screw give you precise movement control so your readings are accurate every time. Johnson's builder's transit level is extremely user-friendly - its built-in sunshade gives you clear sighting, and the large leveling screws are effortless to use. This level comes equipped with a hard-shell carrying case to keep your tool clean and safe when not in use. Builder's transit levels must be attached to a tripod and benefit from a grade rod - consider Johnson's Model 40-6912 builder's transit level system if you are interested in these additional tools.

PRODUCT DETAILS

40-6910 Includes: Builder's transit level and hard-shell carrying case

- Horizontal circle - graduated to single degrees and reads by vernier direct to 15 arc minutes
