

## 8" Inch/Metric Try & Mitre Square - Structo-Cast® Handle

**Model #:** 451  
**UPC:** #049448451005

The essential marking and checking tool for any woodworker, this 200mm try and mitre square makes assessing angles and marking straight cuts easy and accurate. Its Structo-Cast® handle is both durable and lightweight, while its heavy-duty blade is made of stainless steel so you'll never need to worry about rust or corrosion. This square features permanently stamped graduations in mm and cm increments.

### APPLICATION

Johnson's 200mm try and mitre square is the ideal tool for any woodworker or finish carpenter. It can check and mark both internal and external right angles, making it handy for framing, stair-making, shed building and many other carpentry tasks. It is also useful for checking the angles on bench saws and other cutting machinery.
