

Magnetic Angle Locator

Model #: 700
UPC: 049448700004

Simplify angle measurements with Johnson's magnetic angle locator. Featuring a high-impact molded body and an extra-strong ceramic magnet, it effortlessly adheres to ferrous metal surfaces. The V-groove edge ensures a perfect fit on pipes and conduits, while easy-to-read increments display 0-90° in all four quadrants on a durable acrylic lens. For added convenience, one side has inch graduations and the other has metric graduations.

PRODUCT DETAILS

- Durable high-impact molded body for maximum strength and lasting performance
- Measure using our easy-to-read 0-90° increments in all four quadrants, printed on a durable acrylic lens
- Our extra-strong ceramic magnet firmly adheres to ferrous metal surfaces
- Achieve a secure fit with our V-Groove edge, designed for use on pipes and conduits
- Featuring ruled edges with both inch and metric graduations for versatile measurements
