

EASY-TWIST® WIRE CONNECTORS

PUSH-IN WIRE CONNECTORS

- Wire connectors are industry color-coded for easy identification and fit solid or stranded wires in the 22-12 AWG size range
- Push-in connectors with clear construction excel in environments where speed, visual inspection and convenience are required
- Strip the wires and insert one per opening to guarantee a tight, non-slip wire connection
- In-line construction and compact shape provide flexibility for working inside boxes or other tight spaces
- Comes packed with key features for professionals, including an integrated test port, flame retardant polycarbonate body and stainless steel spring

SPECIFICATIONS

- Copper wire only
- Temperature rating: 105° C, 221°F
- 600V Maximum (Building Wire)
- 1000V Maximum (Signs and Luminaires)
